BRITISH JOURNAL OF APPLIED PHYSICS (JOURNAL OF PHYSICS D)

1969—SER. 2, VOL. 2

SUBJECT INDEX

(R) denotes Research Note (L) denotes Letter to the Editor

PAGE

Acceleration of electrons by electrodynamic space-charge effect . . . 717, 1755, 1789
Acoustic detection of mechanically induced cavitation (R) 140
Acoustoelectric amplification at microwave frequencies in InSb in crossed electric and magnetic fields 1411
Acoustoelectric gain and current in piezoelectric semiconductors, non-linear theory—II . 333
Acoustoelectric gain, large-signal, analytical expression for 1589
Adhesion between precious metals 831
Adsorption, infra-red, and electron mobility in reduced tin oxide crystals . . . 1503
Air and nitrogen, similarity in: breakdown voltages 1555
Air and nitrogen, similarity in: ionization, attachment and detachment coefficients . . 1559
Alkali halides, thermal breakdown caused by field-enhanced conduction 1327
Alkali plasma diode, d.c. properties 229
Alloy, Ni–Fe–Cu–Mo, high magnetic permeability by powder metallurgy 357
Alloys, 65% Ni–35% Fe, ferromagnetic domain structures 47
Alloys, heavily doped hot-pressed germanium–silicon, thermoelectric properties of . . 1497
Alloys, iron–cobalt, lattice parameter and Curie point anomalies 485
Alloys, lead–germanium chalcogenide, solid solution of, optical properties 383
Alloys, lithium, lattice parameters (R) 1162
Alloys, PbTe–CdTe, scattering of light-mass holes. 493
Alloys with wide solidification ranges, single-crystal growth technique for (R) . . . 909
Aluminium and magnesium, dynamic stress–strain release paths measured to 200 kb . 275
Amplitude modulation of electromagnetic waves by modulated magnetic fields: modified theory and application to communications in blackout 725
Anemometer, constant-temperature hot-wire, corrections for temperature loading and high gas pressure effects 85
Anisotropy-field distribution in barium ferrite micropowders 1625
Annealing behaviour, low temperature of TLD lithium fluoride 1667
Antimony sulpho-iodide crystals, study of melt growth (R) 1781
Arc cathode current density, preliminary measurements (R) 918
Arcs, a.c., radial temperature measurements 53
Arcs, carbon and graphite, electrode temperatures 413
Arcs, effect of cathode geometry on stability (R) 1345
Arcs, electric, correlation of characteristics of 733
Argon–barium-oxide suspensions postulated as closed-cycle magnetohydrodynamic working fluids, coagulation in 453
Argon, ionically pumped, desorption from clean and metallized glass surfaces (R) . . 913
Argon laser, plasma jet as cathode for 535
Argon, liquid, ionizing-particle induced breakdown 1423
Argon–mercury a.c. discharge, instantaneous electron temperature (R) 611
Attachment and ionization coefficients in bromine, measurement 1577
Attachment and ionization in oxygen at low pressures 213
Attachment and multiple ionization, effects on $\ln(\alpha/p)$ against p/E curves . . . 1437
Attachment, ionization and detachment coefficients: similarity in air and nitrogen . . 1559

Barite single crystals, natural, effect of heat on etch patterns 17
Barium ferrite micropowders, anisotropy-field distribution in 1625
Barium fluoride, display of impurity precipitation, selective etch method 319
Barium titanate, nucleation models for first-order transition front, and observations in (R) 1164
Barium titanate single crystals, high resistivity, cubic-tetragonal phase transitions (R) . 1168
Barium-oxide–argon suspensions postulated as closed-cycle magnetohydrodynamic working fluids, coagulation in 453

PAGE

Beams, electron, *see* Electron beams
Bismuth, resistance ratio (R) . . . 753
Boiling, transient, of liquid metals, analysis . . . 261
Breakdown, electric field, in sulphur hexafluoride (R) . . . 1470
Breakdown, electrical, at small gaps in vacuum, photographic study . . . 1005
Breakdown, electrical, in discharge gap, probability of (R) . . . 1047
Breakdown, electrical, of plasma–electrode system . . . 527
Breakdown, gas, at radiofrequency in presence of transverse magnetic field . . . 1739
Breakdown, ionizing-particle induced, in liquid argon . . . 1423
Breakdown, radiofrequency gas, in presence of transverse magnetic field . . . 1739
Breakdown, streamer, in gases, mechanism of secondary proeesses (R) . . . 137
Breakdown, thermal, caused by field-enhanced conduction in alkali halides . . . 1327
Breakdown time lags, statistical distribution using Townsend mechanism under high-energy particle irradiation . . . 1193
Breakdown voltages: similarity in air and nitrogen . . . 1555
Brightness of electron emission systems . . . 889
Bromine, measurement of ionization and attachment coefficients . . . 1577
Bubble implosion, vapour, new technique for investigating experimentally (R) . . . 630

Cadmium arsenide–nickel arsenide eutectic, electrical and magnetoresistance properties . 1083
Cadmium sulphide crystal in different gaseous media, voltage rectification at free surface . 985
Cadmium sulphide crystals, photochemical effects . . . 1053
Cadmium sulphide films, optimum conditions for evaporation for generation of microwave ultrasonics (R) . . . 1349
Calcium sulphide phosphor, simultaneous study of thermoluminescence and thermally stimulated conductivity (R) . . . 624
Carbon and graphite arcs, electrode temperature . . . 413
Carbon dioxide laser amplifiers, rotational relaxation and saturation gain . . . 1135
Carbon dioxide laser amplifiers, time-dependent processes . . . 183
Carrier concentration in epitaxial gallium arsenide, non-destructive measurement of . . . 1407
Cascades, collision, in gold in energy range 3–169 kev . . . 991
Cathode contamination effects in high-voltage glow discharge . . . 71
Cathode current density of arcs, preliminary measurements (R) . . . 918
Cathode for argon laser, plasma jet as . . . 535
Cavitation, mechanically induced, acoustic detection (R) . . . 140
Cells, silver sulphide, electrical and photoconductive properties . . . 1643
Cerium oxide films, evaporated, electrical properties . . . 159
Charge, collection of, from moving stream of flowing liquid dielectric . . . 1115
Charge generation on dielectric surfaces . . . 1533
Charge mobility, negative, in simple organic liquids . . . 1107
Charge transport through rubber, experimental investigation . . . 567
Chemical polishing of yttrium iron garnet (R) . . . 1159
Chromites, polycrystalline, temperature dependence of dielectric dispersion in . . . 477
Coagulation in barium-oxide–argon suspensions postulated as closed-cycle magnetohydrodynamic working fluids . . . 453
Cobalt crystals, thin, domain walls . . . 353
Cobalt crystals, thin, transition thickness for uniform magnetization in . . . 1279
Cobalt films, evaporated, rotatable initial susceptibility in . . . 669
Cobalt single crystals, scanning electron microscope studies of magnetic domain structure . 1367
Cobalt, thermal conductivity at high temperatures by the Jain and Krishnan method . 101
Coherence, temporal, effect on Fraunhofer diffraction pattern by non-uniformly illuminated slit aperture (R) . . . 1479
Coils, two coaxial, shielding effect of plane conducting sheet between . . . 1599
Collision cascades in gold in energy range 3–169 kev . . . 991
Combustor, pilot-scale coal-fired magnetohydrodynamic, determination of electrical conductivity of gases in . . . 1215
Composition changes, molecular, in flowing CO_2–N_2–He–H_2O laser . . . 1129
Conduction in electroluminescent sublimated thin films of ZnS, mechanism for . . . 1649
Conductivity, thermal, *see* Thermal conductivity

PAGE
Contact, electrical, properties and rupture of microscopic molten metal bridge . . . 589
Contacts, electrical, forces acting when separated 1121
Couette flow between rotating cylinders, relaxation effects in 809
Coupled-circuit method for force calculation in eddy-current devices (R) 757
Cross section, stimulated emission, of Nd^{3+} in $CaWO_4$, measurement (R) . . . 1174
Crystal, cadmium sulphide, in different gaseous media, voltage rectification at free surface . 985
Crystal growth and orientation in vacuum-condensed metal deposits: systematic correlation with residual pressure, rate of deposition and thickness 967
Crystal growth, Czochralski, effect of rotation reversal during (R) 1157
Crystal growth technique, single-, for alloys with wide solidification ranges (R) . . . 909
Crystal, tungsten single, ion-induced electron ejection from gas covered (R) . . . 1177
Crystallite size and microstrains in cold-worked lithium fluoride from x-ray diffraction line profiles 21
Crystals, antimony sulpho-iodide, study of melt growth (R) 1781
Crystals, cobalt single, scanning electron microscope study of magnetic domain structure . 1367
Crystals, CdS, photochemical effects 1053
Crystals, gallium single, thermoelectric power at low temperatures (R) 1467
Crystals, high resistivity $BaTiO_3$ single, cubic-tetragonal phase transitions (R) . . . 1168
Crystals, ice, effects of surface condition on mechanical properties 1517
Crystals, natural barite single, effect of heat on etch patterns 17
Crystals, niobium single, in Meissner state, a.c. losses (R) 1775
Crystals, reduced tin oxide, electron mobility and infra-red adsorption 1503
Crystals, single, of α-$MoTe_2$, photovoltage 855
Crystals, single, of normal and deuterated rubidium dihydrogen arsenate, electro-optic and dielectric properties 177
Crystals, single, of normal and deuterated rubidium dihydrogen arsenate, piezoelectric and elastic properties 171
Crystals, synthetic, of proustite (Ag_3AsS_3), electrical properties 165
Crystals, synthetic quartz, application of neutron diffraction to determination of quality of (R) 1041
Crystals, thin cobalt, domain walls 353
Crystals, thin cobalt, transition thickness for uniform magnetization in 1279
Cubic splines, integration of paraxial ray equation for magnetic electron lenses by (R) . 1620
Curie-point and lattice parameter anomalies of iron–cobalt alloys 485
Current-noise spectrum in MOSTS at very low frequencies 1059
Current-noise spectrum of MOSTS, physical model 1063
Czochralski crystal growth, effect of rotation reversal during (R) 1157

Damping, strain-dependent, of metal in axial vibration, measurement 1693
Decane and hexane liquids, electrical conduction using crossed-wire electrode system . 557
Decay constant, discrete, exceeding $(\nu\Sigma(E))_{min}$ in pulsed neutron experiment . . . 149
Density of random close packing spheres 863
Detachment, ionization and attachment coefficients: similarity in air and nitrogen . . 1559
Detection efficiency of electron multipliers 895
Dichlorodifluoromethane, diffusion and drift of electrons in 1431
Dielectric dispersion in polycrystalline chromites, temperature dependence . . . 477
Dielectric, liquid, collection of charge from moving stream 1115
Dielectric loss, very low, at low temperatures, calorimetric measurement of . . . 699
Dielectric surfaces, charge generation on 1533
Dielectrics, organic, some aspects of electrohydrodynamical behaviour of . . . 999
Diffraction, neutron, *see* Neutron diffraction
Diffraction, x-ray, *see* X-ray diffraction
Diffusion and drift of electrons in dichlorodifluoromethane 1431
Diffusion coefficients, rhenium adsorbed on tungsten, effect of electric field . 13, corr. 636
Diffusion, neutron, *see* Neutron diffusion
Diode, alkali plasma, d.c. properties 229
Diodes, gallium phosphide Zn–O doped electroluminescent, output characteristics (R) . 1180
Diodes, Gunn, with annular geometry, theoretical analysis of domain propagation . . 341
Discharge gap, probability of electrical breakdown in (R) 1047

PAGE

Discharge, high-voltage glow, cathode contamination effects 71
Discharge, long-time-lag triggered, interferometric measurements in (R) 1472
Discharge, mercury–argon a.c., instantaneous electron temperature (R) 611
Discharge plasma in hydrogen spark at small *pd* values, development of 221
Discharge, radio-frequency, extraction of ions from 241
Discharges, neon, secondary ionization processes 1567
Discharges, spark, shock waves from 421
Dispersion, dielectric and mechanical equivalence in poly(*n*-hexyl methacrylate) . . 1301
Dispersion of diffusible ions in fluid flow through cylindrical tube 1447
Domain formation, Gunn-effect, controlled by a complex load 1
Domain, magnetic, studies using permeability spectra I 1353
Domain propagation in Gunn diodes with angular geometry, theoretical analysis . . 341
Domain walls in thin cobalt crystals 353
Domain walls, unusual magnetic, in very thin films, energies of 685
Domains, magnetic spike-like, theory of shape of 515

Eddy-current devices, coupled-circuit method of force calculation for (R) . . . 757
Elastic compliances of KBr, temperature dependence (R) 621
Elastic parameter, C_{33}, for insulating ZnO in temperature range 25–100 °K, temperature dependence of 1383
Elastic properties of polycrystalline metals, anisotropic and composition effects . . 1373
Electrets, Perspex, impulse electric strength 1681
Electric strength, impulse, of Perspex electrets 1681
Electrical and photoconductive properties of silver sulphide cells 1643
Electrical breakdown, *see* Breakdown, electrical
Electrical aspects of evaporation of ice 1021
Electrical charging of electron microscope specimens 1035
Electrical conduction in hexane and decane liquids using crossed-wire electrode system . 557
Electrical conductivity of gases in pilot-scale coal-fired magnetohydrodynamic combustor . 1215
Electrical conductivity, apparatus for high-temperature measurement 691
Electrical properties of $SnSe_2$ 1507
Electrode, uniform field, for use in discharge chamber of restricted size: design and performance 77
Electrohydrodynamical behaviour of organic dielectrics 999
Electroluminescence, d.c., and materials control in ZnS: Mn, Cu, Cl powder phosphors . 953
Electroluminescence, gallium phosphide (Review) 637
Electroluminescent cell, d.c., efficient infra-red phosphors excited by 509
Electromagnetic gun, coaxial, with central positive electrode, simple model:—II . . 429
Electron beams, brightness 457
Electron diffraction, low energy, patterns from faceted metal surfaces (R) . . . 145
Electron ejection, ion-induced, from gas-covered tungsten single crystal (R) . . . 1177
Electron emission systems, brightness of 889
Electron energy distribution, time-resolved measurement 1747
Electron microscope, 1·5 MV (Review in French) 769
Electron microscope, scanning, study of magnetic domain structure of cobalt single crystals 1367
Electron microscope specimens, electrical charging of 1035
Electron microscope, transmission electron spectrometer for use with 1757
Electron microscope, transmission, selected-area, electron spectrometry in . . . 1767
Electron mobility and infra-red adsorption in reduced tin oxide crystals 1503
Electron multipliers, detection efficiency 895
Electron spectrometer, selected-area, in transmission electron microscope 1767
Electron temperature in flame plasmas, probe measurements 471
Electronic components, thermally accelerated testing (R) 1189
Electrons, diffusion and drift, in dichlorodifluoromethane 1431
Ellipsoid, double-layer, permittivity of (R) 921
Ellipsometer, method for calibrating analyser and polarizer in (R) 1483
Emission characteristics, secondary electron, of TaC, TiC and ZrC, automatic measurements 1539

PAGE
Emission cross section, stimulated, of Nd^{3+} in $CaWO_4$, measurement (R) . . . 1174
Emission électronique secondaire d'une cible de molybdène bombardée par des ions positifs et negatifs d'un même element 441
Emission, field, from wires (R) 1617
Epitaxial films of PbTe and PbSe, field effect measurement in 975
Epitaxial gallium arsenide, non-destructive measurement of carrier concentration . . 1407
Epitaxial growth of films of ZnS evaporated on to NaCl 775
Etch method, selective, display of impurity precipitation at dislocations in BaF_2 . . 319
Etch patterns, effect of heat on, natural barite single crystals 17
Eutectic mixture, molten silver chloride–silver iodide, thermoelectric properties (R) . . 305
Evaporating sphere, stationary, force on, in presence of second similar sphere . . . 1147
Evaporation of ice, electrical aspects of 1021
Exchange and magnetostatic interactions between particles in permanent magnetic materials 33

Faraday effect, hot-electron, in non-polar semiconductors 1527
Faraday rotation in theta-pinch plasma, measurement of 1013
Faraday rotation, microwave, in some anisotropic n-type germanium samples at room temperature 1089
Ferromagnetic domain structures in nickel–iron alloys 47
Fibres, graphitized, fine structure of 787
Field emission from metal particles in vacuum gap 881
Field emission from wires (R) 1617
Field distribution in nitrobenzene using the Kerr effect 447
Field-effect measurement on epitaxial PbTe and PbSe films 975
Film, iron, magnetization distribution about magnetic particle (R) 1171
Film, thin metallic, hill-climbing techniques as method of calculating optical constants and thickness of (R) 301
Films, cadmium sulphide, optimum conditions for evaporation for generation of microwave ultrasonics (R) 1349
Films, electroluminescent sublimated thin, of ZnS, mechanism for conduction . . . 1649
Films, epitaxial, PbTe and PbSe, field-effect measurement in 975
Films, evaporated cerium oxide, electrical properties 159
Films, evaporated cobalt, rotatable initial susceptibility in 669
Films, photosensitive iodide, holographic recording 197
Films, thin metal, in island form, effective optical constants (R) 123
Films, thin permalloy, effect of surface roughness on susceptibility 1267
Films, very thin, energies of unusual magnetic domain walls 685
Films, ZnS evaporated on to NaCl, epitaxial growth 775
Filters, fibrous and membrane, optical properties 577
Flash method for measuring thermal diffusivity of cracked specimens, suitability . . 597
Flow, fluid, through cylindrical tube, dispersion of diffusible ions in 1447
Flow of dilute polymer solutions through tubes and granular beds, relaxation effects in . 797
Flow of viscous sphere resting on flat surface (R) 760
Flow stress of b.c.c. metals at low temperatures 377, 930
Fluids, critical point exponent of thermal conductivity of 1291
Focusing factor in stratified medium 605
Focusing in spherically stratified medium 1457
Forces acting when electrical contacts separate 1121
Fracture, brittle, of glass under normal and sliding loads (R) 1784
Fracture, effects of time and plasticity 1245
Fraunhofer diffraction pattern, effect of temporal coherence on, using non-uniformly illuminated slit aperture (R) 1479
Friction properties of oriented crystalline polymers 1687

Gain, large-signal acoustoelectric, analytical expression for 1589
Gallium arsenide, epitaxial, non-destructive measurement of carrier concentration . . 1407
Gallium arsenide, luminescence studies of new line associated with germanium in . . 1657
Gallium phosphide electroluminescence (Review) 637
Gallium phosphide Zn–O doped electroluminescent diodes, output characteristics (R) . 1180

PAGE
Gallium single crystals at low temperatures, thermoelectric power (R) 1467
Gas breakdown at radiofrequency in presence of transverse magnetic field . . . 1739
Gas, mixtures, polyatomic, heat conduction through (R) 463
Germanium, anisotropic n-type, at room temperature, microwave Faraday rotation in . 1089
Germanium in GaAs, luminescence studies of new line associated with 1657
Germanium–silicon alloys, heavily doped hot-pressed, thermoelectric properties of . 1497
Glass, brittle fracture, under normal and sliding loads (R) 1784
Gold, collision cascades in energy range 3–169 kev 991
Gold, segregation to the silicon (111) surface, observed by Auger emission spectroscopy and by LEED 1635
Graphite and carbon arcs, electrode temperatures 413
Gunn diodes with annular geometry, theoretical analysis of domain propagation . . 341
Gunn-effect domain formation controlled by a complex load 1

Heat conduction through polyatomic gas mixtures (R) 463
Helium–neon laser, impurity studies in (R) 1474
Hexane and decane liquids, electrical conduction using crossed-wire electrode system . 557
Hexane, effect of liquid motion on ion mobility 93
Hill-climbing techniques as method of calculating optical constants and thickness of thin metallic film (R) 301
Holography, recording on photosensitive iodide films 197
Hydrogen, measurement of ionization coefficients 867
Hydrogen spark at small *pd* values, development of discharge plasma in 221

Ice crystals, effects of surface condition on mechanical properties 1517
Ice, electrical aspects of evaporation of 1021
Impact parameters involved in long-rod penetrations into semi-infinite targets, velocity dependence (R) 613
Impurity precipitation at dislocations in BaF_2 319
Indium antimonide, acoustoelectric amplification at microwave frequencies, in crossed electric and magnetic fields 1411
Indium antimonide and PbTe, polycrystalline layers of, electrical surface properties of . 839
Injection laser, simple approximation for high-temperature properties 1549
Iodide films, photosensitive, holographic recording 197
Ionization and attachment coefficients in bromine, measurement 1577
Ionization and attachment in oxygen at low pressures 213
Ionization, attachment and detachment coefficients: similarity in air and nitrogen . . 1559
Ionization coefficients in hydrogen and nitrogen, measurement 867
Ionization coefficients in nitrogen containing radioactive impurities 205
Ionization, multiple, and attachment, effects on $\ln(\alpha/p)$ against p/E curves . . . 1437
Ionization processes, secondary, in neon discharges 1567
Ionizing-particle induced breakdown in liquid argon 1423
Ions, diffusible, dispersion in fluid flow through cylindrical tube 1447
Ions, extraction from radio-frequency discharge 241
Ions highly stripped, sources of 1705
Ions, potassium, in nitrogen, drift and diffusion 551
Irradiation, high-energy particle, statistical distribution of breakdown time lags by Townsend mechanism under 1193

Johnsen–Rahbek effect, simple theory 325
Joints, ahesive, yield of 821
Joshi effect under visible radiations, study of spectral sensitivity of 474

Kerr effect for field distribution in nitrobenzene 447

Langmuir probe, variation of r.f. response with amplitude and frequency . . . 1095
Lanthanum chromite, strontium-doped, properties 1225
Laser amplifiers, CO_2, rotational relaxation and gain saturation 1135
Laser amplifiers. CO_2, time-dependent processes 183

PAGE

Laser, argon, plasma jet as cathode for 535
Laser, electro-optically *Q*-switched, reduction of loss due to rod strain birefringence (R) . 627
Laser, flowing CO_2–N_2–He–H_2O, molecular composition changes in 1129
Laser, He–Ne, impurity studies (R) 1474
Laser, injection, simple approximation for high temperature for high-temperature properties 1549
Laser pulse, giant, strong shock wave generation by interaction with solid target (R) . 1186
Lattice, one-dimensional non-dissipating, shock waves in 1389
Lattice parameters and Curie-point anomalies of iron–cobalt alloys 485
Lattice parameters of some lithium alloys (R) 1162
Lattice strains, residual, effect of mode on unloading on (R) 1045
Lead–germanium chalcogenide alloys, solid solution of, optical properties 383
Lead telluride and InSb, polycrystalline layers of, electrical surface properties . . . 839
Lead zirconate titanate, polycrystalline, switching of 1487
LEED and RHEED studies of growth of nickel on silver (111) surface (R) 1779
LEED, segregation of gold to the silicon (111) surface observed by 1635
Lifetime, non-constant recombination, thermally stimulated current curves with . . 371
Light, coherent, scattering from rough surface 1027
Liquid dielectric, collection of charge from moving stream 1115
Liquid motion, effect on ion mobility in hexane 93
Liquids, rheology, very near solid boundaries 251
Liquids, simple organic, negative charge mobility in 1107
Lithium alloys, lattice parameters (R) 1162
Lithium fluoride, cold-worked evaluation of crystallite size and microstrains from x-ray diffraction line profiles 21
Lithium fluoride, TLD, low temperature annealing behaviour 1667
Losses, a.c., in niobium single crystals in Meissner state (R) 1775
Losses, a.c., in type I superconductors in Meissner state (R) 1463
Low temperature annealing behaviour of TLD lithium fluoride 1667
Lubrication, elastohydrodynamic, of highly elastic cylindrical surface 1317

Magnesium and aluminium, dynamic stress–strain release paths measured to 200 kb . 275
Magnetic domain studies using permeability spectra I 1353
Magnetic domain walls in very thin films, energies 685
Magnetic domains, spike-like, theory of shape of 515
Magnetic materials, conventional soft, recent developments (Review) 933
Magnetic materials, permanent, magnetostatic and exchange interactions between particles 33
Magnetic permeability, high, in Ni–Fe–Cu–Mo alloy made by powder metallurgy . . 357
Magnetization distribution about magnetic particle in iron film (R). 1171
Magnetohydrodynamic power generation electrodes, possible use of strontium-doped lanthanum chromite 1225
Magnetometer, nuclear maser, method for precise tuning (R) 143
Magneto-optical observations, interpretation 365
Magnetostatic and exchange interactions between particles in permanent magnetic materials 33
Magnetron sputter ion pump, role of energetic neutrals in 1609
Malvern's theory, theoretical and experimental analysis of high-strain-rate tensile tests . 1235
Manganin, temperature coefficient of resistance at high pressures 1675
Maser magnetometer, nuclear, method for precise tuning (R) 143
Materials control and d.c. electroluminescence in ZnS: Mn, Cu, Cl powder phosphors . 953
Materials, conventional soft magnetic, recent developments (Review) 933
Meissener state, a.c. losses in type I superconductors in (R) 1463
Melt growth of antimony sulpho-iodide crystals (R) 1781
Mercury plasma, dynamic sheath growth in 541
Mercury–argon a.c. discharge, instantaneous electron temperature (R) 611
Metal bridge, microscopic molten, properties and rupture 589
Metal crystals, solid solution hardening (R) 126
Metal deposited, vacuum-condensed, crystal growth and orientation in: systematic correlation with residual pressure, rate of deposition and thickness 967
Metal films, thin, in island form, effective optical constants (R) 123
Metal particles in vacuum gap, field emission from 881

PAGE

Metal surfaces, faceted, LEED patterns (R) . . . 145
Metallic film, thin, hill-climbing techniques as method of calculating optical constants and thickness of (R) . . . 363
Metallized and clean glass surfaces, desorption of ionically pumped argon from (R) . . 913
Metals, b.c.c., at low temperatures, flow stress . . . 377, 930
Metals, determination of optical constants (R) . . . 468
Metals in axial vibrations, measurement of strain-dependent damping . . . 1693
Metals, liquid, analysis of transient boiling . . . 261
Metals, polycrystalline, anisotropic and composition effects in elastic properties . . 1373
Metals, precious, adhesion between . . . 831
Microscope, 1·5 MV electron (Review in French) . . . 769
Mobilities of ions in hexane, effect of liquid motion . . . 93
Moiré patterns from surface and their application in measuring topography . . 287
Moisture probe, h.f., response to soluble salts . . . 1293
Molybdene bombardée par des ions positifs et negatifs d'une même élément, emission électronique secondaire . . . 441
Molybdenum telluride, photovoltage of single crystals . . . 855
MOSTS, physical model of current-noise spectrum . . . 1063
MOSTS, spectrum of current noise in, at very low frequencies . . . 1059

Neon discharges, secondary ionization processes . . . 1567
Neon–helium laser, impurity studies in (R) . . . 1474
Neutrals, energetic, role in magnetron sputter ion pump . . . 1609
Neutron diffraction applied to determination of quality of synthetic quartz crystals (R) . 1041
Neutron diffusion measurements in water from 18 to 280 °c . . . 401
Neutron, pulsed, experiment, existence of discrete decay constant exceeding $(\nu\Sigma(E))_{\min}$ in . 149
Neutron waves and sound waves, relationship between . . . 389
Nickel arsenide–cadmium arsenide eutectic, electrical and magnetoresistance properties . 1083
Nickel, trapping and re-emission of fast deuterium ions from . . . 1397
Niobium single crystals in Meissner state, a.c. losses (R) . . . 1775
Niobium stannide, microstructure impurity content and critical current density in . . 521
Nitrobenzene, field distribution in, using Kerr effect . . . 447
Nitrogen and air, similarity in: breakdown voltages . . . 1555
Nitrogen and air, similarity in: ionization, attachment and detachment coefficients . . 1559
Nitrogen containing radioactive impurities, ionization coefficients . . . 205
Nitrogen, measurement of ionization coefficients . . . 867
Nucleation models for first-order transition front, and observations in barium titanate (R) 1164

Optical constants, effective, of thin metal films in island form (R) . . . 123
Optical constants of metals, determination (R) . . . 468
Optical properties of fibrous and membrane filters . . . 577
Optical properties of solid solution of lead–germanium chalcogenide alloys . . . 383
Optical properties of $SnSe_2$ . . . 1507
Oscillations, free damped, in viscoelastic materials . . . 1261
Oxidation states, cation, in spinel $ZnMnFeO_4$, determination by x-ray spectroscopy (L) . 635
Oxygen at low pressures, ionization and attachment . . . 213
Oxygen atoms, production in microwave discharge and recombination kinetics in gas flow system . . . 1717

Palladium, thermal conductivity at high temperatures by Jain and Krishnan method. . . 1283
Paraxial ray equation for magnetic electron lenses, integration of, using cubic splines (R) . 1620
Permeability spectra I, magnetic domain studies using . . . 1353
Permalloy films, thin, effect of surface roughness on susceptibility . . . 1267
Permittivity of double-layer ellipsoid (R) . . . 921
Perspex electrets, impulse electric strength . . . 1681
Phase transitions, cubic-tetragonal, in high resistivity $BaTiO_3$ single crystals (R) . . 1168
Phase zone plates, focal properties (L) . . . 1789
Phosphor, CaS, simultaneous study of thermoluminescence and thermally stimulated conductivity (R) . . . 624

CONTENTS

JANUARY 1969

PAPERS — PAGE

Gunn-effect domain formation controlled by a complex load — S. Mahrous and H. L. Hartnagel — 1

The electroluminescent–photoluminescent radiation converter — J. Wojciechowski — 7

The effect of an electric field on the surface diffusion of rhenium adsorbed on tungsten — D. W. Bassett and M. J. Parsley — 13

Effect of heat on the etch patterns of natural barite single crystals (2 plates) — A. R. Patel and J. Koshy — 17

Evaluation of crystallite size and microstrains in cold-worked lithium fluoride from x-ray diffraction line profiles — D. Lewis and D. O. Northwood — 21

Temperature diffuse scattering for powder patterns from hexagonal crystals — G. B. Mitra and N. K. Misra — 27

Magnetostatic and exchange interactions between particles in permanent magnet materials (2 plates) — D. J. Craik and R. Lane — 33

Ferromagnetic domain structures in 65% nickel–35% iron alloys (3 plates) — J. H. Jackson and E. W. Lee — 47

Radial temperature measurements of alternating current arcs — B. Bowman and H. Edels — 53

Development of a theory to describe constricted positive columns in alkali-metal-seeded rare gases — H. I. Ellington — 65

Cathode contamination effects in a high-voltage glow discharge (1 plate) — J. T. Maskrey, S. D. Ford and R. A. Dugdale — 71

A uniform field electrode for use in a discharge chamber of restricted size: design and performance — J. S. Pearson and J. A. Harrison — 77

Correction for temperature loading and high gas pressure effects for the constant-temperature hot-wire anemometer — H. Hassan and J. C. Dent — 85

The effect of liquid motion on ion mobility in hexane — E. Gray and T. J. Lewis — 93

Thermal conductivity of metals at high temperatures by the Jain and Krishnan method: II—Cobalt — S. C. Jain, V. Narayan and T. C. Goel — 101

Thermal conductivity of metals at high temperatures by the Jain and Krishnan method: III—Platinum — S. C. Jain, T. C. Goel and V. Narayan — 109

On the expansion and shrinkage of space-charge clouds — G. Schön and S. Masuda — 115

RESEARCH NOTES

The effective optical constants of thin metal films in island form — L. Ward — 123

On solid solution hardening of metal crystals — G. Lehmann — 126

High-resolution measurements of plasma density — J. L. Watson and A. D. Beach — 129

Asymmetrical double-probe systems — J. D. Swift — 134

The mechanism of secondary processes in the streamer breakdown of gases — E. D. Lozansky — 137

Acoustic detection of mechanically induced cavitation — M. H. Safar — 140

Method for precise tuning of a nuclear maser magnetometer — W. H. U. Krause and D. C. Lainé — 143

Low-energy electron diffraction patterns from faceted metal surfaces (1 plate) — R. J. Reid and H. Mykura — 145

BOOK REVIEWS — 147

FEBRUARY 1969

PAPERS — PAGE

The existence of a discrete decay constant exceeding $(\rho\Sigma(E))_{\min}$ in the pulsed neutron experiment — J. Wood — 149

Electrical properties of evaporated cerium oxide films — M. Stuart — 159

The electrical properties of synthetic crystals of proustite (Ag_3AsS_3) (1 plate) — P. H. Davies, C. T. Elliott and K. F. Hulme — 165

Some physical properties of single crystals of normal and deuterated rubidium dihydrogen arsenate: I—Piezoelectric and elastic properties — R. S. Adhav — 171

Some physical properties of single crystals of normal and deuterated rubidium dihydrogen arsenate: II—Electro-optic and dielectric properties — R. S. Adhav — 177

Time-dependent processes in CO_2 laser amplifiers — R. C. Crafer, A. F. Gibson, M. J. Kent and M. F. Kimmitt — 183

Holographic recording on photosensitive iodide films — M. R. Tubbs, M. J. Beesley and H. Foster — 197

The extraction of ions from a radio-frequency discharge . . . . . R. G. Carter and R. H. C. Newton 241
The rheology of liquids very near to solid boundaries . . . . . A. T. J. Hayward and J. D. Isdale 251
Analysis of the transient boiling of liquid metals . . . . . A. M. Judd 261
Dynamic stress–strain release paths for aluminium and magnesium measured to 200 kb . . . . . P. J. A. Fuller and J. H. Price 275
Moiré patterns from the surface and their application in measuring topography (1 plate) . . . . . Chung Chiang 287
On the technique of measuring the high-temperature thermal conductivity of a rod . . . . . P. Wagner 293

RESEARCH NOTES

Hill-climbing techniques as a method of calculating the optical constants and thickness of a thin metallic film . . . . . L. Ward, A. Nag and L. C. W. Dixon 301
Thermoelectric properties of the molten silver chloride–silver iodide eutectic mixture . . . . . K. Cornwell and R. W. Dyson 305

BOOK REVIEWS 308

MARCH 1969

PAPERS PAGE

Solution grown SiC p–n junctions (1 plate) . . R. W. Brander and R. P. Sutton 309
Display of impurity precipitation at dislocations in BaF_2 by selective etch method (2 plates) . . . . . A. R. Patel and R. P. Singh 319
A simple theory of the Johnsen–Rahbek effect . . . . . R. Atkinson 325
A non-linear theory of acoustoelectric gain and current in piezoelectric semiconductors: II . . . . . P. N. Butcher and N. R. Ogg 333
Theoretical analysis of domain propagation in Gunn diodes with annular geometry . . . . . C. O. Newton 341
Domain walls in thin cobalt crystals . . . G. A. Jones and B. K. Middleton 353
High magnetic permeability in a Ni–Fe–Cu–Mo alloy made by powder metallurgy . . . . . R. D. Enoch and D. L. Murrell 357
The interpretation of magneto-optical observations . . . . . P. H. Lissberger and M. R. Parker 365
Thermally stimulated current curves with non-constant recombination lifetime . . . . . R. Chen 371
The flow stress of body-centred cubic metals at low temperatures . . P. Feltham 377
Solid solution of lead–germanium chalcogenide alloys and some of their optical properties . . . . . P. M. Nikolić 383
Relationships between neutron waves and sound waves . . . M. M. R. Williams 389
Neutron diffusion measurements in water from 18 to 280°C . . . . . R. A. Bowen and M. C. Scott 401
Electrode temperatures of carbon and graphite arcs K. R. Hearne and S. A. Nixon 413
Shock waves from spark discharges . . . R. A. Freeman and J. D. Craggs 421
A simple model of the coaxial plasma gun with positive central electrode: II . . . . . G. J. Pert 429
Ion induced re-emission of noble gas atoms from polycrystalline tungsten: I . . . . . K. Erents and G. Carter 435
Emission électronique secondaire d'une cible de molybdène bombardée par des ions positifs et négatifs d'un même élément . . . . . M. Perdrix, S. Paletto, R. Goutte et C. Guillaud 441
Field distribution in nitrobenzene using the Kerr effect . . . . . A. W. Bright, B. Makin and A. J. Pearmain 447
Coagulation in barium-oxide–argon suspensions postulated as closed-cycle magneto-hydrodynamic working fluids . . . . . B. Waldie and I. Fells 453
The brightness of electron beams . . . . . J. Worster 457

RESEARCH NOTES PAGE

Heat conduction through polyatomic gas mixtures . . . . R. S. GAMBHIR 463
Possible sources of error in the deduction of semiconductor impurity concentrations from Schottky-barrier (*C*, *V*) characteristics . B. L. SMITH and E. H. RHODERICK 465
Determination of the optical constants of metals . . . . R. S. SIROHI 468
On probe measurements of electron temperature in flame plasmas . . O. SAHNI 471
A study of the spectral sensitivity of the Joshi effect under visible radiations . . . . C. MANDE and P. L. KANITKAR 474

APRIL 1969

PAPERS PAGE

The temperature dependence of dielectric dispersion in polycrystalline chromites . . . . B. J. SEALY 477
Lattice parameters and Curie-point anomalies of iron–cobalt alloys . . . . H. STUART and N. RIDLEY 485
Scattering of light-mass holes in PbTe–CdTe alloys. . . . J. M. BRETTELL 493
Studies of the mechanism of the Thorn image-retaining panel . . . . G. F. J. GARLICK, R. HARVEY, P. J. CLEWER and P. W. RANBY 501
Efficient infra-red emitting phosphors excited by a d.c. electroluminescent cell . . . . N. J. WERRING, A. VECHT and J. W. FLETCHER 509
A theory of the shape of spike-like magnetic domains (1 plate) . . P. F. DAVIS 515
Microstructure, impurity content and critical current density in Nb_3Sn (1 plate) . . . . P. B. HART, C. HILL, R. OGDEN and C. W. WILKINS 521
An investigation of the electrical breakdown of a plasma–electrode system . . . . D. G. FEARN 527
A plasma jet as cathode for an argon laser . . . . A. MAITLAND 535
Dynamic sheath growth in a mercury plasma . . R. H. VAREY and K. F. SANDER 541
The drift and diffusion of potassium ions in nitrogen . . . . I. A. FLEMING, R. J. TUNNICLIFFE and J. A. REES 551
Electrical conduction in hexane and decane liquids using a crossed-wire electrode system . . . . T. R. HESKETH and T. J. LEWIS 557
An experimental investigation of charge transport through rubber . . . . R. E. CARLEY READ and C. D. STOW 567
Optical properties of fibrous and membrane filters (1 plate) . . . . J. MCK. ELLISON and B. BILES 577
The electrical contact: the properties and rupture of the microscopic molten metal bridge (2 plates) . . . . M. J. PRICE and F. LLEWELLYN JONES 589
Suitability of the flash method for measuring the thermal diffusivity of cracked specimens . . . . D. SHAW, L. A. GOLDSMITH and A. LITTLE 597
Focusing factor in a stratified medium . . . . M. S. SODHA, R. A. SIROHI and A. K. CHAKRAVARTI 605
